An initiative of Internal Quality Assurance Cell (IQAC)

National Seminar
on

**Setting Technological Standards and
Strategy for Higher Education**

1 and 2 February 2018

The University

Christ University was born out of the educational vision of St Kuriakose Elias Chavara, an educationalist and social reformer of the nineteenth century in South India. He founded the first Catholic indigenous congregation, Carmelites of Mary Immaculate (CMI) in 1831 which administers Christ University.

Established in 1969 as Christ College, it undertook path breaking initiatives in Indian higher education with the introduction of innovative and modern curricula, insistence on academic discipline, imparting of Holistic Education and adoption of global higher education practices with the support of creative and dedicated staff. The University Grants Commission conferred Autonomy to Christ College in 2005 and identified it as an Institution with Potential for Excellence in 2006. In 2008 under Section 3 of the UGC Act, 1956, the Ministry of Human Resources Development of the Government of India, declared the institution a Deemed to be University, in the name and style of Christ University. One of the first institutions in India to be accredited in 1998 by the NAAC, and subsequently in 2004 and 2016 Christ University has the top grade 'A' in the 4-point scale.

The multi-disciplinary University which focuses on teaching, research and service offers Bachelors to Doctoral programmes in Humanities, Social Sciences, Science, Commerce, Management, Engineering, Education and Law to over 18000 students. The campus is a living example for the harmonious multiculturalism with students from all the states of India and from around 60 different countries. Christ University publishes six peer-reviewed research journals and has published around 200 books in Kannada and in English. A promoter of sports, music and literary activities, it is a nurturing ground for creative excellence.

Centre For Education Beyond Curriculum (CEDBEC)

The Centre has been conceived as an attempt to stimulate and rediscover through experience, the perspectives in education so that individuals and institutions reflect and rediscover themselves and move towards a sustainable progress in the educational arena.

Focus

The focus of the two day seminar is to enable the educational leaders to develop and implement strategies that will make information technology a key parameter for success in higher education. The program also provides an experiential opportunity for participating leaders to design and take away models and perspectives of solutions that can be implemented in their respective institutions.

Context

Technological innovation is changing the very way of teaching and learning in higher education. Judicious use of this crucial technological back up will equip the passing graduates to effectively compete in today's knowledge economy. Distance education, Virtual Learning, advanced Learning Management Systems and Communication and Collaboration Solutions to integrate with research partners from around the world are just some of the transformational benefits that universities are embracing presently. But these are not without significant challenges.

Despite all its benefits, technology remains a disruptive innovation—and an expensive one too. Faculty members used to teaching in one way may be loath to invest the time to learn new methods, and may lack the budget for the needed support. This is one of the major challenges that needs the focus and concentration of educational leaders and strategists to strike at as a delivery and capability mechanism and to come up with feasible technology solutions. It's imperative that leaders dedicate time and effort to identify, implement and to drive effective utilization of solutions to constantly upgrade the possibilities for a fully integrated, technology facilitated higher education.

Call for Papers and Presentations

Papers are invited on the following themes:

Themes

- Leadership that enables Technology, Innovation and Change
- Collaboration Technology for Higher Education
- The Connected Campus - Reimagining Higher Education
- Transforming the Eco- system of Learning and Teaching
